

# Capability Development

Gartner states that the #3 barrier to ML & AI adoption is finding meaningful use cases and defining a strategy.

Mosaic has been designing & deploying analytics since 2004. We have learned a thing or two about how to layout a successful analytics strategy.

## Why Mosaic?

Mosaic has been designing, deploying, and improving custom data science solutions since 2004. In that time, we have learned what makes an organization ready for ML & AI and how to train an organization to harness these insights.

## What do we offer?

### ML/AI Program & Project Evaluation

Mosaic provides ongoing technical support, project leadership, mentoring, evaluation, and advisory support to guide a nascent or high-functioning analytics team on people, processes, projects, and technology. **Our data scientists staff move as fast as you would like with objectives & tasking determined in close collaboration to maximize ROI with Mosaic.**

### Advanced Analytics Assessment

Mosaic performs comprehensive assessments of current organizational capabilities and activities related to ML; identifying gaps and bottlenecks, reviewing and improving the current roadmap, and selecting/ prioritizing projects that generate business value with the appropriate level of investment.

### Technical Training

Mosaic's tailor-made training curriculum offers courses both for executive & technical staff, emphasizing the business value that can be driven by advanced analytics, effective processes for incorporating advanced analytics tools and insights into business processes, and how to identify, develop, and prioritize advanced analytics opportunities.
